Application/Control Number: 10/605,794

Art Unit: 2856

DETAILED ACTION

Allowable Subject Matter

Claims 1-63 are allowed.

The following is an examiner's statement of reasons for allowance:

Claim 1 is exemplary of remaining independent claims 11, 28, 37, 53 and 57.

The closest prior art of Taylor et al. (US Patent Application 2003/0019304) teaches obtaining sample flow rate controlled on the basis of sample concentration. However, Taylor does not teach obtaining sample from a second location.

Similarly, Kurz (US Patent 4,566,342) teaches controlling flow based on flow characteristics measured at different locations but Kurz only samples from a single location.

Veelenturf et al. (US Patent 6,241,950) samples and measures constituents from several locations but controls the flow from the different locations based on pressure rather than the measured constituents. Furthermore, the locations are in different rooms rather than a single duct.

Apley et al. (US Patent 4,442,720) teaches controlling flow from several different locations based on expected spatial flow characteristics (figures 2-4) but not based on actual measured flow or constituent concentration.

De Baun et al. (US Patent 3,842,678), Diesel (US Patent 4,413,533), and Rizzie (US Patent 4,660,587) similarly sample from several locations but flow is not controlled on the basis of measured constituent concentration as in the instant invention.

Claims 11, 28, 37, 53 and 57 are allowed for substantially the same reason as claim 1.

Claims 2-10, 12-27, 29-36, 38-52, 54-56 and 58-63 depending from allowable claims 1, 11, 28, 37, 53 or 57 are allowable for the same reason.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles D. Garber whose telephone number is (571) 272-2194. The examiner can normally be reached on 6:30 a.m. to 3:00 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hezron Williams can be reached on (571) 272-2208. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
